SUMMARY

B.Tech CSE student (2027) and Full-Stack Developer skilled in React, Node.js, Express, and MongoDB. SDE internship experience building 20+ REST APIs and 6 database models, including secure authentication.

EDUCATION

Jagannath University, Jaipur — Jaipur, Rajasthan, India
Bachelor of Technology, Computer Science and Engineering — *2023 – 2027*
Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems
SGPA (Semester VI): 7.64

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), C++, SQL
Frontend:	React.js, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, REST API Design, JWT Auth, Joi Validation
Databases:	MongoDB, Mongoose, MySQL
AI Integration:	Google Gemini API, LLM-based conversational systems
Tools & Platforms:	Git, GitHub, Postman, Docker, Cloudinary, Vercel, Render, VS Code

EXPERIENCE

The Entrepreneurship Network (TEN) — Remote
Software Development Engineer Intern — Aug 2026 – Oct 2026

- **Architected a 4-layer RESTful backend** (Routes → Controllers → Models → MongoDB) using Node.js, Express.js, and Mongoose, delivering **20+ REST API endpoints** for authentication, train, and station management.
- **Engineered train management APIs** with MongoDB ObjectId validation, station existence checks, duplicate train-number prevention, source/destination validation, and structured error handling using HTTP status codes (400/404/409).
- **Designed 6 Mongoose data models and document relationships** across users, trains, stations, schedules, bookings, and payments, using MongoDB references and `.populate()` to retrieve associated entities.
- **Implemented JWT-based authentication** with bcrypt password hashing, credential verification, Bearer-token validation, and protected API middleware, with USER/ADMIN role modeling for access control.

CloudCredits Technologies Pvt. Ltd. — Jaipur, Rajasthan, India
Frontend Developer Intern — Jun 2025 – Sep 2025

- **Built responsive, cross-browser interfaces** using HTML5, CSS3, and JavaScript, ensuring full mobile responsiveness across the product's frontend.
- **Integrated RESTful APIs** for frontend-backend communication and debugged API integration and data retrieval issues across the application.

TECHNICAL PROJECTS

StackMind – Full-Stack Conversational AI Platform — *GitHub* | *Live*
MongoDB, Express.js, React.js, Node.js, Google Gemini 2.5 Flash API, RESTful APIs, Docker

- **Integrated the Google Gemini 2.5 Flash API** to power a full-stack conversational AI platform with isolated, session-based thread persistence in MongoDB.
- **Designed a MongoDB thread architecture** for isolated user conversations, enabling persistent thread and message retrieval across chat sessions.
- **Developed a custom React typing animation** that progressively renders AI responses word-by-word, creating a real-time conversational experience.

WanderLust – Hotel Listing Platform — *GitHub* | *Live*
MongoDB, Express.js, React.js, Node.js, JWT, Joi, Cloudinary

- **Built a full-stack hotel listing platform** with **19 REST API endpoints** covering authentication, profile management, listings, reviews, bookings, and host dashboard operations.
- **Implemented JWT-based authentication and resource-level authorization** for listing owners, booking users, and review authors, securing CRUD operations with middleware-based access control.
- **Engineered booking workflows** with server-side date validation, stay-duration/price computation, and ownership-based cancellation and host confirmation, using Joi validation, Cloudinary uploads, and centralized async error handling.

ACHIEVEMENTS & CERTIFICATIONS

- **2x Smart India Hackathon (SIH) Internal Round Winner** – prototyped solutions with cross-functional teams.
- **LeetCode** – Solved 100+ problems using a pattern-based approach to strengthen data structures, algorithms, and coding interview skills (Profile).
- **Alpha – DSA with Java**, Apna College – comprehensive course on data structures, algorithms, and problem-solving in Java.
- **Delta – Full Stack Web Development**, Apna College – full-stack course covering JavaScript, React.js, and Node.js, MongoDB.
