SUMMARY

Full-Stack Developer (B.Tech CSE, 2027) with hands-on experience across the MERN/Node stack, RESTful API architecture, and LLM-powered application development. Currently building production backend systems as an SDE Intern, with prior experience shipping a full-stack conversational AI platform integrated with the Google Gemini API. Strong foundation in database modeling, authentication/authorization, API validation, and layered backend design.

EDUCATION

Jagannath University, Jaipur

Bachelor of Technology, Computer Science and Engineering

Jaipur, Rajasthan, India

2023 – 2027

Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems

SGPA (Semester VI): 7.64/10

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), C++, SQL
Frontend:	React.js, Next.js, Tailwind CSS, HTML5, CSS3
Backend:	Node.js, Express.js, REST API Design, Layered Architecture, JWT Auth, Joi Validation
Databases:	MongoDB, Mongoose, PostgreSQL, MySQL, Prisma (SQL & NoSQL data modeling)
AI Integration:	Google Gemini API, LLM-based conversational systems
Tools & Platforms:	Git, GitHub, Postman, Docker, Cloudinary, Vercel, Render, VS Code

EXPERIENCE

The Entrepreneurship Network (TEN)

Software Development Engineer Intern

Remote

Aug 2026 – Present

- **Architected a 4-layer RESTful backend** (Routes → Controllers → Models → MongoDB) using Node.js, Express.js, and Mongoose, delivering **11 REST API endpoints** for authentication, train, and station management.
- **Engineered train management APIs** with MongoDB ObjectId validation, station existence checks, duplicate train-number prevention, source/destination validation, and structured error handling using HTTP status codes (400/404/409).
- **Designed 6 MongoDB data models and document relationships** across users, trains, stations, schedules, bookings, and payments, using MongoDB references and `.populate()` to retrieve associated entities.
- **Implemented JWT-based authentication** with bcrypt password hashing, credential verification, Bearer-token validation, and protected API middleware, with USER/ADMIN role modeling for access control.

CloudCredits Technologies Pvt. Ltd.

Frontend Developer Intern

Jaipur, Rajasthan, India

Jun 2025 – Sep 2025

- **Built responsive, cross-browser interfaces** using HTML5, CSS3, and JavaScript, ensuring full mobile responsiveness across the product's frontend.
- **Integrated RESTful APIs** for frontend-backend communication, debugging and resolving issues that **improved data retrieval efficiency by 25%**.

TECHNICAL PROJECTS

StackMind – Full-Stack Conversational AI Platform

[GitHub](#) | [Live](#)

MongoDB, Express.js, React.js, Node.js, Google Gemini 2.5 Flash API, RESTful APIs, Tailwind CSS

- **Integrated the Google Gemini 2.5 Flash API** to power a full-stack conversational AI platform with isolated, session-based thread persistence in MongoDB.
- **Designed a scalable MongoDB thread architecture** with optimized data retrieval for real-time conversational AI workflows.
- **Developed a custom React streaming engine** with a 40ms word-by-word animation loop, eliminating front-end rendering bottlenecks during complex state updates.

WanderLust – Hotel Listing Platform

[GitHub](#)

MongoDB, Express.js, React.js, Node.js, JWT, Joi, Cloudinary

- **Built a full-stack hotel listing platform** with **20 REST API endpoints** covering listings, authentication, bookings, reviews, user workflows, and host dashboard operations.
- **Implemented JWT-based authentication and resource-level authorization** for listing owners, booking users, and review authors, securing CRUD operations with middleware-based access control.
- **Engineered booking workflows** with server-side date validation, stay-duration/price computation, and ownership-based cancellation and host confirmation, using Joi validation, Cloudinary uploads, and centralized async error handling.

ACHIEVEMENTS & CERTIFICATIONS

- **2x Smart India Hackathon (SIH) Internal Round Winner** – prototyped solutions with cross-functional teams.
